

This heatmap displays the distribution of the 'Age' variable across the 50 US states. The x-axis represents age groups from 2 to 40, and the y-axis represents the states. The color scale ranges from dark blue (low density) to red (high density). The highest concentrations of the population are in the 2-10 age range, particularly in the Northeast and Midwest. The distribution is generally skewed towards younger ages, with a notable peak in the 2-4 age group.
